Azure Logs

- It comes with an acceptable intro cost
- It requires NO maintenance time (as it's a service)
- It's scalable with reasonable cost
- It comes with NO 'out of the box' queries

Azure Logs

- It comes with an acceptable intro cost
- It requires NO maintenance time (as it's a service)
- It's scalable with reasonable cost
- It comes with NO 'out of the box' queries
- but with an addition of Power BI and Azure Dashboards

allows **YOU** to build what **YOU** need in minutes (*)!!

But it is NOT

a SIEM solution

Instead look for Azure Sentinel

https://azure.microsoft.com/en-in/services/azure-sentinel

an SQL database
 Build your own 'relations' on-the-fly

an ELK replacement

 a subset of Logs is stored

Yet Another Tool

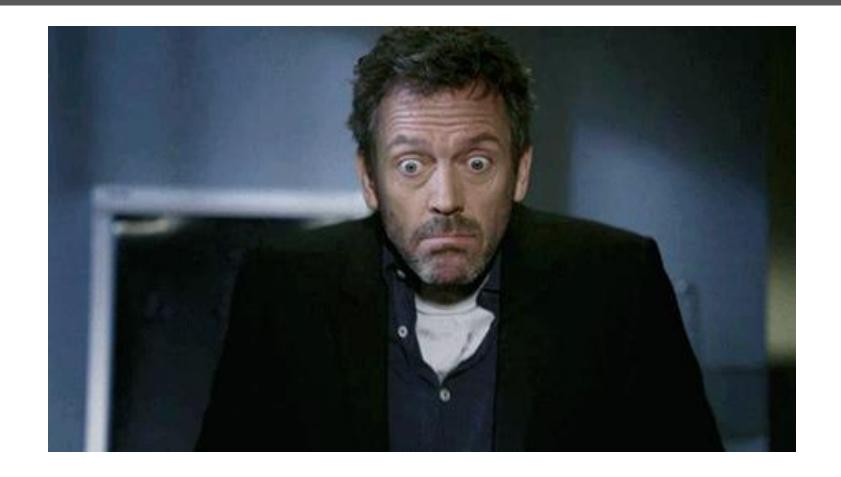

POWER Shell
